

# ELCON

## Plate type metal detector for installation in conveyor belts and material chutes

- Detects magnetic and non-magnetic metal contamination, even when enclosed in product
- Reduces expensive machinery failure and minimises production downtime
- Ensures product quality
- Prevents customer complaints
- Break even within a very short period of time

- To analyse smalls and bulk materials with material height up to 100 mm
- Flat design enables simple integration in conveyor belts and production lines
- No metal free zone
- Easy installation, detector plate can be used as belt gliding plate
- Pre-installed parameters simplify operation
- Learn automatic or manual product compensation (*not* pre-adjusted) to improve adaption to product and conveyor belt conductivity
- Increased signal-to-noise-ratio towards electromagnetic pollution, vibrations and conveyor belt distortion

*Machinery protection. Plate type metal detector ELCON installed on the conveyor belt leading to the granulator.*

### Additional Performance Features:

- High scanning sensitivity to all metals
- Machinery parameters shown on eight LEDs; operated through three control buttons, a reset and a test starter
- Product memory for eight products, three products pre-installed
- Maintenance free electronic, no readjustment necessary

### Product Description:

The single-face metal detector ELCON is used to inspect smalls and bulk materials on conveyor belts or material chutes, preferably of low material height.

It detects all magnetic and non-magnetic metal contaminations (steel, stainless steel, aluminium) – even if enclosed in the product. On detection of metal, a signal device and a separation system can be activated or a signal can be sent to process controlling.

### Scope of Delivery:

- Plate type metal detector ELCON
- Control Unit PRIMUS

### Options/Accessories:

- Optical and acoustic signal system
- Digital incident counter
- Conveyor stop and turning prevention control
- UL/CSA Certification
- Further options on request

### Typical Application Areas:

- Plastics industry, In-house recycling
- Chemical industry
- Wood industry

### Application:

- Machinery protection for granulators, shredders, hocks, crushers, calenders and many more
